

# TENT OWNERS MANUAL

## FAST FRAME CABIN 10 PERSON

### BEFORE YOU BEGIN

This tent requires a minimum of two people to set up  
Read all the instructions before setting up your tent.  
Check parts list to ensure you have full contents  
Find a Flat area for your tent, free from rocks, potholes and branches  
Ensure that you use all pegs, ropes and additional poles only as instructed  
If conditions are windy, arrange tent as to have narrowest side of tent facing into the wind  
Keep away from Open Flames, DO NOT USE Stoves or Burning Appliances inside the tent

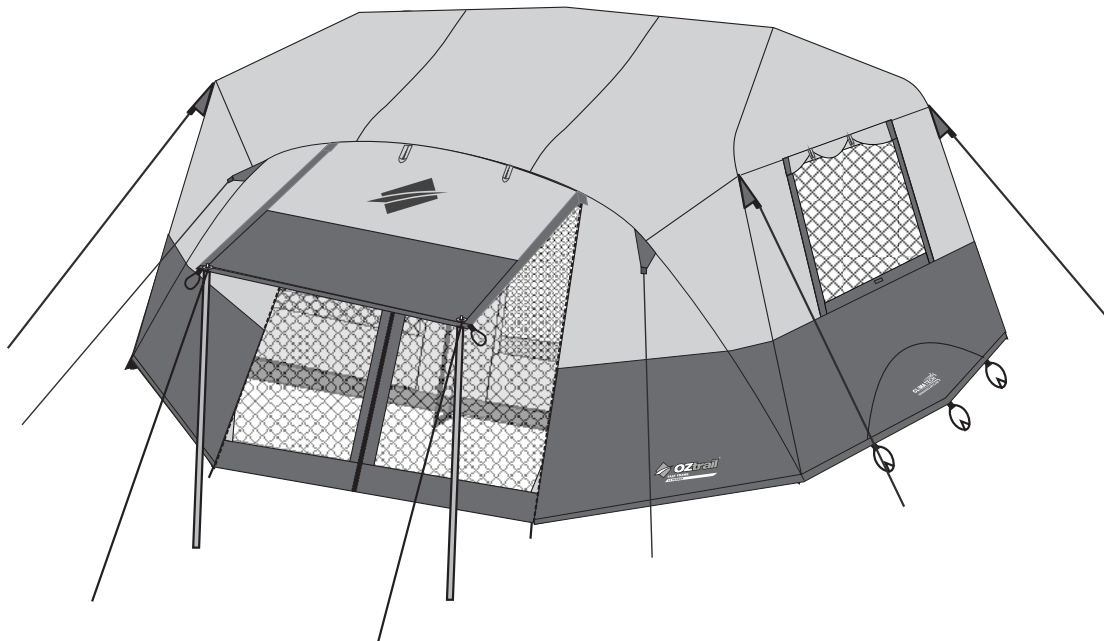

### WARNING

#### AVOID CONTACT WITH OPEN FLAMES:

This tent is manufactured to meet CPAI-84 Fire Retardant standards. The fabric may burn if in continuous contact with open flame sources.

#### CONDENSATION IS NOT LEAKING:

Minimise condensation by ensuring your tent is well ventilated through windows, doors or vents.

DuraPlus Vestibule Pole x 1:

Steel Awning Pole x 2:

Steel Portico Pole x 2:

### STORAGE

To maximise the life of your tent, always ensure it is clean of dirt and debris.  
Never store if wet or damp. Consider airing your tent at home after your trip and allow to completely dry before storing between trips  
Continued exposure to sunlight can degrade the polyesters used to make tents. Always store your tent in its storage bag, away from direct light in a cool, dry space

# TENT OWNERS MANUAL

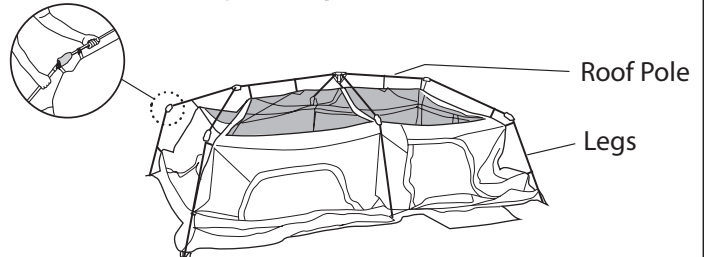

## FAST FRAME CABIN 10 PERSON

### STEP 1: LAYOUT THE INNER TENT

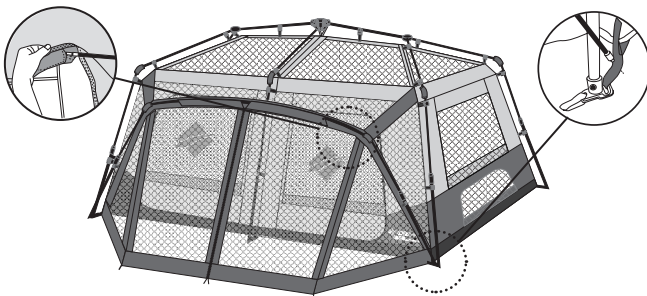

Unfold the inner tent and outstretch over a flat, clear area  
 Arrange the door so it is facing your desired area for entry & exit  
 Fold leg poles away from the center of the tent, so the roof framing stands up

### STEP 2: RAISE THE ROOF & ERECT FRAME

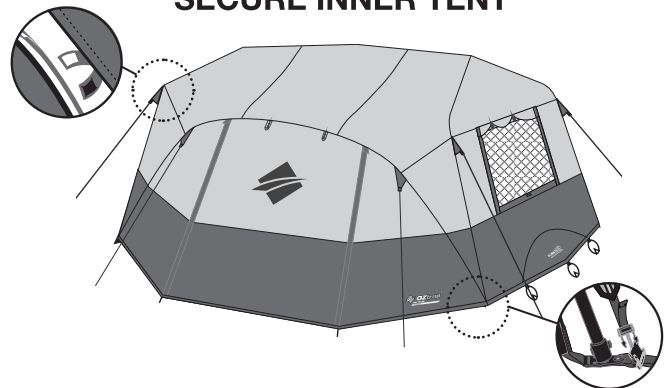

Locate roof poles and lift upwards from base, to the horizontal position.  
 The leg poles will angle at joints and partially stand up  
 Extend the vertical frame legs until they click into position, fully extended  
 Repeat on the legs in the center and other corners of the tent  
 Place rainfly over the Inner tent so red webbing on the fly face the rear of the tent

### STEP 3: SET UP VESTIBULE

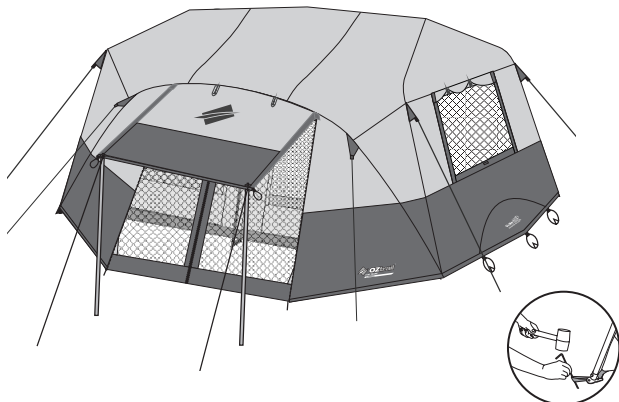

Place Vestibule pole through sleeve located at the front of the inner tent  
 Insert Vestibule pole into black plastic molding  
 Insert Steel Portico Pole into opposite side of black molding  
 Connect base of Portico Pole to ring and pin on Grey Webbing stitched to Inner tent corner  
 Attach plastic clips to tent poles on vestibule

### STEP 4: PUT ON FLY AND SECURE INNER TENT

Place rain fly over the inner tent with vestibule facing the front  
 Secure rain fly to tent with Velcro tabs located on underside of rain fly  
 Connect the fly to the tent using the buckles on tent corners

### STEP 5: ASSEMBLE THE AWNING

Use the awning poles and additional ropes to suspend the door panel overhead  
 Peg out the tent and fly around the perimeter

### STEP 6: ALWAYS PEG OUT AND USE GUY ROPES

In windy and rainy conditions, awnings must be dismantled, and doors must be closed, and guy ropes must be set out

### PACK UP:

TO TAKE DOWN THE TENT, REVERSE THE PREVIOUS STEPS
