STICK

USER GUIDE

BIVY STICK

GETTING STARTED

Download the Bivy app for iOS from the App Store or for Android from the Play Store. Create a Bivy account.

While in phone service or WiFi, turn on your Bivy Stick by pressing the power button for 2 seconds. The power indicator light will illuminate.

On the app menu, select "STICK."

Select **CONNECT VIA BLUETOOTH**

Your Bivy Stick will now pair with your phone. This will only take a few seconds. Once it is connected you will see the battery life and signal strength icon in the upper right corner on the app.

Once your phone is connected to the Bivy Stick, select **MANAGE ACCOUNT**

Follow the steps to activate your Bivy Stick. It will require you to input emergency contact information and credit card info. During this process you will also have the opportunity to purchase a Global Rescue membership for additional coverage in case of an emergency.

NOTE: SOS Monitoring and dispatch is a service provided by Global Rescue to all active Bivy Stick users as part of your monthly service fee. A Global Rescue membership provides additional services. More info about a membership can be found here:

<https://ss.globalrescue.com/partner/bivy/>

During the activation process you will choose the data plan that best fits your needs. No matter which data plan you choose, the Bivy Stick will be active on the Iridium satellite network for 30 days. Even if you use all your allotted credits, you can still continue to use the Stick at the rate of \$0.50 per overage credit.

Once your Stick is activated, you will be assigned your own dedicated phone number which will stay the same until you cancel service. You can find this phone number on the STICK screen in the app.

USING THE APP

You can see the status of your Bivy Stick and account at any time by using the app. On the HOME screen you can see how many credits you have used and how many you have remaining.

BIVY STICK CREDITS

AVAILABLE 53

USED 47

On the STICK screen, you will be able to see if your Stick is active, when your active account renews or ends, and your credit status. You can also navigate to many features of Bivy Stick, including Messages, Weather, SOS, and Check In message setup.

Get Reports >

MESSAGING

Make sure you are connected to the Stick via Bluetooth. Enter the Messages screen from the Stick page or by tapping "MESSAGES" on the bottom menu.

HOME

MAP

STICK

MESSAGES

The Bivy app will ask if you would like to sync your contacts. This can take up to 5 minutes, depending on how many contacts you have in your phone.

Use the  New Message button to start a new text chain. Type in the name, number or email address of the person you want to message. You can send one message to multiple people, but each message will go to the recipient individually, and replies will come in their own thread. It does not work like standard group messaging.

Once you have picked your recipient, enter your message into the message field at the bottom of the screen. Maximum 160 characters.

You can also hit the  Location button to the left of the message field to automatically add your GPS coordinates and a link for recipients to see your location on a map on the Bivy website.

When a message is being sent out, the status of the message will say "Sending." The Status light on the Stick will flash yellow. Once it has successfully been sent, the Status light on the Stick will no longer flash yellow and the message status on the app will change from "Sending" to a timestamp.

Use the  Check In button to set up or edit the recipients and the pre-set message sent when you press the Check In button on the Bivy Stick (see page 6).

The  Mailbox Check button will send a request to pull down any messages from satellite that may be waiting. If there is an urgent matter, use the Mailbox Check button to check for messages immediately. You can do 6 Mailbox Checks for 1 credit.

The Bivy Stick automatically listens for incoming messages for 5 minutes after sending or receiving a message. It then goes to sleep to preserve battery life, but wakes up every 15 minutes to check for messages. When the Signal light is on, the Stick is listening for messages. When the Signal light is off, it's sleeping to preserve battery life. You can manually wake up the Stick to listen for messages for 2 minutes with a very short press of the Power button.

WEATHER

Navigate to the Weather screen from the HOME screen or the STICK Screen. If your phone is in cell/WiFi service, you can update a weather report for free at any time.

When you are off-grid, touch the Refresh button  in the top right corner of the Weather screen to get the latest weather report.

You will have 2 options:

- Standard 3 day 3-hour-increment forecast for 1 credit
- Premium 7 day 2-hour-increment forecast for 2 credits

Each forecast will take a few minutes to update depending on the strength of the satellite signal. You will receive a push notification once your forecast is ready to view. The forecast is based on your current location.

TRACKING/LOCATION SHARE

When you are in tracking mode, the Bivy Stick will automatically send your location every 10 minutes. Followers can see the updates to your location by viewing your profile on the Bivy website. The easiest

way to share a link to your profile is to send a message which includes your GPS coordinates, inserted by clicking the Location button. The recipient can click this link to view your location on the website. It will not notify anyone of your location while in tracking mode, but will be visible to others that look at your profile. You get one hour of tracking per credit.

If you are in phone service and not connected to the Bivy Stick, the Bivy app will share your location much more frequently.

To track using the Bivy Stick, make sure you are connected via Bluetooth.

On the HOME screen select "NEW ADVENTURE". This will take you to the map screen. Push the large "TRACK" button on the bottom center.

Choose your activity type.

It will ask you if you want to track through Bivy Stick. Select "Enable Bivy Stick Tracking." It will ask if you want to share your location. Select "Share with Everyone" or "Share with Friends" if you want to be visible to others.

To stop tracking, push the "PAUSE" button and then the Check button. Be sure to turn off your location sharing if you no longer want to be visible.

Your distance, speed, calories burned, and other stats will be recorded and saved to your profile. You can name your tracks or upload them to the Bivy database for others to use if you want.

SOS

In case of emergency you can hit the SOS button on the app and establish 2-Way communication with Global Rescue. You can also activate an SOS from the button on the Bivy Stick (see page 6) but using the app allows for communication directly with Global Rescue. They will dispatch and manage all the emergency needs and resources necessary. This service is available world wide.

Touch the SOS button on the Bivy Stick screen. You will be asked to confirm your request and to type in the letters SOS to verify it's not an accidental SOS call.

Once you have confirmed, it will send an emergency text with your GPS coordinates and location to Global Rescue.

Be sure to keep your Bivy Stick visible to the sky to ensure satellite connectivity. You will receive a confirmation text letting you know the message has been received. Your Bivy Stick will automatically send your location to Global Rescue once per minute for 10 minutes, and then every 10 minutes thereafter.

At this point you can communicate any details with them via text message. Global Rescue will keep you apprised of the rescue plan and status.

If you need to cancel the SOS call, you can do so by touching the cancel SOS button on the app. This will send a message to Global Rescue and they will confirm it has been received and cancelled.

NOTE: Please be sure to treat the SOS service with complete seriousness. Only use in the case of a real emergency. Depending on your location and needs, you may be responsible for any cost associated with a rescue operation.

USING YOUR BIVY STICK WITHOUT YOUR PHONE

If you do not want to carry your phone, or it is not functioning, your Bivy Stick can be used without it. All of the essential features can be used on the device itself, with the exception of 2-way communication. You are only able to send preset outgoing messages with the Bivy Stick alone. Here is how to use the Stick without a phone.

CHECK IN MESSAGE

Press the Check In button (a press and hold will initiate tracking - see page 7). Once a message is queued up to be sent, the status light will flash yellow until the message is successfully sent.

Bivy Stick will send the message you wrote to the recipient(s) you identified in the Check In message setup in the Bivy app. The message will also include your GPS coordinates.

SOS

The SOS button is located under the red flap on the bottom of the device. To activate, lift the flap and press and hold the button for 5 seconds.

Once the SOS is activated, the status light will begin to flash red and an emergency message will be sent to Global Rescue, along with your location, at regular intervals. It will also flash yellow initially letting you know that a message is queued up to be sent.

When possible, it's better to activate an SOS through the Bivy app (see page 5) so you can communicate directly with Global Rescue about the nature of your emergency.

To cancel an SOS from the Bivy Stick, press and hold the SOS button for 5 seconds. Once the red light stops flashing, the SOS has been cancelled.

TRACKING

You can start tracking your location by pressing the Check In button for 5 seconds. While tracking, your location will be sent to your Bivy profile on the cloud every 10 minutes. The Status light will flash blue while you are tracking. Stop tracking by pressing the Check In button for 5 seconds. You can later view this track by going to your profile in the Bivy app and then select Tracks.

BIVY STICK MOUNTING SYSTEM

The Bivy Stick comes ready to adapt to any GoPro® mounting system. This is done by using the provided ¼" - 20, 2-prong GoPro® mount adapter. Thread the adapter into the back of the Bivy Stick, then attach to the GoPro® mounting system of your choice.

NOTE: If attaching to the outside of a vehicle or location that may see high wind speeds, vibrations or force, you should use a secondary tether to ensure you do not lose or damage your Bivy Stick.

CHARGING YOUR BIVY STICK

The Bivy Stick charges using a USB-C cable and can be charged via any USB charge port. Use the supplied USB-C to USB-A cable or any other USB-C cable. Charge time is 2-4 hours depending on power source. Charge time is approximately one half if you use a USB-C charger and a USB-C to USB-C cable.

TECH SPECS

Battery Type: Lithium Ion Polymer

Battery Size: 1500 mAh

Battery Life: Up to 120 hrs with standard operation

Optimal Operating Temperature: 10F - 105F

Dimensions: 1 ¾ in / 45 mm wide, 4 ⅝ in / 111.5 mm tall, 13/16 in / 20.5 mm thick

Weight: 3.35 oz / 95 g

Ingress Protection Rating: IP67

GoPro® is a registered trademark of GoPro, Inc. of Delaware, which is not affiliated with the maker of this product and does not endorse this product.

UNDERSTANDING THE LIGHTS ON THE BIVY STICK

1. Power indicator light:

The light next to the power button will show the device is on. It will normally be dim to preserve battery life. Pressing the power button quickly will brighten the light for better visibility.

Green = 50-100%

Yellow = 20 -50%

Red = 0 - 20%

You can charge your device with any USB-C cable by plugging it into the port on the bottom of the Bivy Stick.

2. The Signal light:

The Signal light indicates satellite visibility status.

Green = Strong

Yellow = Medium/Weak

Red = Weak/None

The Signal light will turn off after a few minutes to preserve battery. Quickly push the power button to turn the Signal light back on. Occasionally, you may see the Signal light flashing. This means the device is acquiring a GPS location lock and should only last a few seconds if you are out in the open. It will not get a GPS lock if you are inside.

3. Status light:

The Status light can show several different colors:

Yellow = Message is being sent

Green = Message has been received

Blue = Currently tracking and sharing location

Red = SOS has been activated

If the Status light is flashing green, that means a message has been received from the satellites but has not been sent to the phone yet. Make sure your phone is connected to the Stick via Bluetooth and open the Bivy app to receive the message.

If the Status light is yellow, a message is on the Stick trying to send to the satellite. Move to a different location with a more open view of the sky or wait a few minutes for a satellite to come into view. Satellites cross the sky over about 2 hours so new satellites can come into or out of view at any time.

SAFETY AND PRODUCT INFORMATION

USAGE REQUIREMENTS

• Messaging, tracking, SOS, weather and all Bivy Stick features require an active Bivy Stick base data plan. You will need to pay for a base plan of service in order for

- your Bivy Stick to communicate with the satellite network. Always test your device before taking it off grid.
- Ensure that you have clear view of the sky when using messaging, tracking and SOS.
 - Battery Warning and Notices : A lithium-ion polymer battery is used in this device. The battery is internal and non-user-replaceable for various purposes. If these guidelines are not followed, batteries may experience a shortened life span or may present a risk of damage to the device, fire, chemical burn, electrolyte leak, and/or injury. Also, failure to heed the following notice could result in personal or property damage, or negatively impact the device functionality.
 - Do not disassemble, modify, remanufacture, puncture or damage device or battery
 - Do not remove or attempt to remove any components of the device
 - Do not expose device to fire, explosions, high temperatures or other hazards.
 - Do not place in high temperature environments. Such as an unattended vehicle, near a heater, or fire, or in direct sunlight for extended periods of time.
 - Do not submerge or soak device in any liquid.
 - Do not operate device outside of the recommended temperature ranges.
 - When storing the device for extended periods of time, store in a dry environment in temperatures between 35F and 75F.
 - Do not use a power/data cable that is not approved or supplied by Bivy.
 - Do not place device on dashboard or any other unsecured place in vehicle. Also be sure that it is not located someplace that will be a distraction while operating a vehicle. In the case of accident or crash, an unsecured device could injure driver or passenger.
 - Do not use the Bivy Stick or Bivy app while driving. Always stop and park vehicle before using cell phone or app.
 - Bivy uses maps provided by public and private sources and is not responsible for the accuracy of the map. Some data may be inaccurate and incomplete.
 - Always use your best judgement when navigating off road or participating in outdoor activities.
 - Bivy Stick and Bivy app is a resource for suggested routes. It should not take the place of research, preparation and experience in the backcountry.
 - Do not follow route suggested if it directs you into illegal activity such as trespassing, or into a dangerous situation. Know your limits and exposure to risk.
 - Always defer to posted signs and conditions during navigation.
 - Always be mindful of inherent risks, environment, weather and other factors before embarking on an outdoor activity.

- By using the device you agree to the terms and conditions of the user agreement. To review those terms please visit: <https://www.bivy.com/terms>
- By using the device you also agree to the terms and conditions of the privacy policy. To review those please visit: <https://www.bivy.com/privacy>
- If disposing of the device, please do so in accordance with local regulations according to Lithium Ion Polymer battery disposal.
- The Bivy Stick may experience degraded performance if you use it in proximity to any device that uses a terrestrial broadband network operating close to the frequencies used by any global Navigation Satellite system (GNSS), Such as the Global Positioning Service (GPS). Use of such devices may impair reception of GNSS signals.
- The Bivy Stick is a mobile transmitter and receiver that uses an internal antenna to send and receive low levels of radio frequency energy for data communications. The device emits RF energy below the published limits when operating in its maximum output power mode. To comply with RF exposure compliance requirements, the device should be a minimum of 20cm between the device and your body during operation. The device should not be used in other configurations. This device must not be co-located or operated in conjunction with any other transmitter or antenna.

FCC INFORMATION

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and may cause harmful interference to radio communications if not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the device and the receiver.
 - Consult dealer or an experienced radio/TV technician for help.
- This device does not contain any user-serviceable parts.

Repairs should only be made by Headgate LLC or a Headgate authorized service center. Unauthorized repairs or modifications could result in permanent damage to the device, and void your warranty and your authority to operate this device under part 15 regulations.

WARRANTY

THIS SAFETY AND WARRANTY SECTION CONTAINS IMPORTANT INFORMATION ABOUT YOUR BIVY STICK. HOWEVER, THE TERMS UNDER WHICH YOU USE THE BIVY STICK ARE LISTED AT <https://www.bivy.com/terms>. YOU WILL BE REQUIRED TO ACCEPT THOSE TERMS WHEN YOU ACTIVATE THE BIVY STICK.

LIMITED WARRANTY

THIS LIMITED WARRANTY GIVES YOU SPECIFIC RIGHTS, AND YOU MAY HAVE OTHER LEGAL RIGHTS, WHICH VARY FROM STATE TO STATE (OR BY COUNTRY OR PROVINCE). HEADGATE LLC DOES NOT EXCLUDE, LIMIT OR SUSPEND OTHER LEGAL RIGHTS YOU MAY HAVE UNDER THE LAWS OF YOUR STATE (OR COUNTRY OR PROVINCE). FOR A FULL UNDERSTANDING OF YOUR RIGHTS YOU SHOULD CONSULT THE LAWS OF YOUR STATE, COUNTRY OR PROVINCE.

We warrant this device to be free from defects in materials or workmanship for one year from the date of purchase. Within this period, Headgate will, at its sole option, repair or replace any components that fail in normal use under normal conditions. Such repairs or replacement will be made at no charge to the customer for parts or labor, provided that the customer shall be responsible for any transportation costs. This Limited Warranty does not apply to: (i) cosmetic damage, such as scratches, nicks, and dents; (ii) consumable parts, such as batteries, unless product damage has occurred due to a defect in materials or workmanship of the product; (iii) damage caused by accident, abuse, misuse, water, flood, fire, or other acts of nature or external causes; (iv) damage caused by service performed by anyone who is not an authorized service provider of Headgate; or (v) damage to a product that has been modified or altered except by specific written instruction from Headgate.

This device is intended to be used only as a travel aid and must not be used for any purpose requiring precise measurement of direction, distance, location or topography. Headgate makes no warranty as to the accuracy or completeness of map data. This Limited Warranty also does not apply to, and Headgate is not responsible for, any degradation in the performance of this device resulting from its use in proximity

to any handset or other device that utilizes a terrestrial broadband network operating on frequencies that are close to the frequencies used by any Global Navigation Satellite System (GNSS) such as the Global Positioning Service (GPS). Use of such devices may impair reception of GNSS signals.

THE WARRANTIES AND REMEDIES CONTAINED IN THIS LIMITED WARRANTY ARE IN LIEU OF, AND HEADGATE EXPRESSLY DISCLAIMS, ALL OTHER WARRANTIES AND REMEDIES, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, STATUTORY REMEDY OR OTHERWISE. IF IMPLIED WARRANTIES CANNOT BE DISCLAIMED UNDER THE LAWS OF YOUR STATE OR COUNTRY, THEN SUCH WARRANTIES ARE LIMITED IN DURATION TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL HEADGATE BE LIABLE IN A CLAIM FOR BREACH OF WARRANTY FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, WHETHER RESULTING FROM THE USE, MISUSE OR INABILITY TO USE THIS PRODUCT OR FROM DEFECTS IN THE PRODUCT. IN NO EVENT SHALL HEADGATE'S LIABILITY EXCEED THE AMOUNT YOU PAID FOR THE PRODUCT TO WHICH ANY CLAIM RELATES.

If during the warranty period you submit a claim for warranty service in accordance with this Limited Warranty, then Headgate will, at its option: (i) repair the device using new parts or previously used parts that satisfy Headgate's quality standards, (ii) replace the device with a new device or a refurbished device that meets Headgate's quality standards, or (iii) exchange the device for a full refund of your purchase price.

SUCH REMEDY SHALL BE YOUR SOLE AND EXCLUSIVE REMEDY FOR ANY BREACH OF WARRANTY.

Repaired or replaced devices have a 90-day warranty. If the device sent in is still under its original warranty, then the new warranty is 90 days or to the end of the original 1 year warranty, whichever is longer. Before seeking warranty service, please access and review the online help resources available on www.bivy.com. If your device is still not functioning properly after making use of these resources, contact Headgate at support@bivy.com to obtain warranty service. If you are in the United States, you can also call 1-385-955-0998. Warranty service is only available inside the United States.
